PROJECTS

- **Intelligent Interactive Portfolio** github
  (05/2025 , 09/2025)
  - Built and deployed a responsive personal portfolio using Django, HTML, CSS, and JavaScript.
  - Integrated MySQL for managing projects, blogs, experience, and skills dynamically.
  - Designed a modern, mobile-first UI in Figma and integrated AI (Gemini) for personalized interactions.
  - Created Web Scrapper for fetching Social Media Updates from diffrent sites.
  - Automated deployment via GitHub Actions + cPanel, using SSH for secure deployment.
  - Enhanced SEO performance and optimized load time for better user reach and visibility.

- **AI Based Persoanlized Blog Website** github
  (07/2025 , 09/2025)
  - Built a full-stack blog platform with user authentication, post creation/editing, and comment system.
  - Developed it to be SEO-friendly and mobile-responsive using HTML, CSS, and JavaScript.
  - Implemented Django REST APIs and secure session management for robust backend handling.
  - Deployed via GitHub Actions + FTP for automated CI/CD pipeline on cPanel hosting.
  - Added personalized content recommendations using AI integration to boost user engagement.

- **College Community Website** github
  (08/2025 , Present)
  - Developed and deployed a full-stack community website for member engagement and collaboration.
  - Implemented user authentication, posts, and discussion forums with Django backend.
  - Designed a responsive, mobile-friendly frontend for better accessibility.
  - Set up CI/CD deployment pipelines ensuring seamless updates and scalability.
  - Enhanced community experience by adding event updates, resource sharing, and announcements.
